Professional Summary

Dynamic, likeable, results-oriented and creative Software Developer with 1+ years of professional experience developing websites, analytic dashboards, database, and several independent projects. With a Bachelor's in Electronic Engineering and currently enrolled on a Computer Programming - Java Certification at CCSF, my main skill set are related to JavaScript, Node.js, React.js, Express.js, Java and some AWS. I have a passion for data visualization and API integration. I also have over 3 years of Project Management and business administration experience.

Technical Skills

JavaScript, jQuery, HTML, CSS, Express.js, Node.js, Java, Mongoose, MongoDB, React.js, ES6, AJAX, RESTful, API, SQL, Git, PostgreSQL, Bootstrap, Ruby on Rails, Responsive web design.

Work Experience

Microsoft (April 2019 – Present) – Workplace Experience Coordinator

- Coordination and Administrative support for Workplace Services.
- Assisting with meeting coordination and event coordination.
- Maintenance of key communication with vendors to provide services and goods for the office.
- Management and coordination of furniture arrangement, space reset and space usability.
- Integration of Microsoft culture into the workspace and administrative support to management as needed.
- Identification and resolution of problems presented related to IT, equipment malfunction and other office needs.

Enara Health (Mar 2018 – Oct 2018) – Software Developer

- Proposed, designed, architected and wrote a full-stack Lab Results Database application using Ruby on Rails.
- Worked with JavaScript, Node.js, Express.js, HTML, CSS and API integration, to build the front-end of a new Patient Dashboard, and a Lab Results Tracker for patients to follow their progress during their weight loss program.
- Developed a Clinical Dashboard to contribute with Primary Doctors and Dietitians track their patients' progress and the physician's progress by implementing a multiple database integration (SQL & PostgreSQL) through Mode Analytics using HTML, CSS and HighCharts.js API integration.
- Reduced 85% time spent over the phone with health insurance companies by developing an automated patient eligibility system using Salesforce Apex and integrated it with PokitDok API.

J. Villalobos Consulting (Oct 2017 – Jun 2018) – Web Developer

- Designed, implemented and developed user friendly websites using JavaScript, HTML, CSS, Sketch.
- Created web components and UX redesign for existing commercial company websites on WordPress.
- Participated in Customer Facing communications and interactions to assess their website requirements.
