EXPERIENCE

MICROSOFT
San Francisco, CA
Experience Coordinator
Apr 2019

I work directly with the mixed reality team to coordinate events for the tech community as part of the Microsoft effort to encourage software learning and inclusivity.

- Coordination and setup of mixed reality (MR) workshops and HoloLens demonstrations.
- Identification and resolution of problems related to information technology, equipment, and other office needs.
- Organization of and support for tech related events including Hackathons, Bootcamps, Tech Talks, and Tech related Meetups.

ENARA HEALTH
San Francisco, CA
Software Developer
Mar 2018 – Oct 2018

Individual contributor to the company's consumer products. Worked alongside the data analyst and CEO to deliver solutions on time for the development and testing of applications dedicated to patients enrolled on a diabetes health program and implementation of new technologies to increase productivity across teams.

- Implementation lead for full-stack Ruby on Rails and PostgreSQL lab results database with web-tool input platform for laboratory records.
- Developed front-end interface for web dashboards using Node.js, Express.js, JavaScript, HTML, CSS, DOM manipulation and integration of InBody API to deliver data visualization through a mobile platform while increasing 65% the mobile user traffic.
- Developed a clinical dashboard using Mode Analytics, JavaScript, PostgreSQL, CSS, HTML, integration of multiple database sources and integration of Chart.js API to complement the internal performance metrics tracker.
- Reduced by 85% time spent over the phone with the development of an automated healthcare eligibility system using Salesforce Apex, Salesforce CRM, and integration of PokitDok API.

J. VILLALOBOS CONSULTING
San Francisco, CA
Web Developer
Oct 2017 – Jun 2018

Worked directly with the founder of the company to provide high quality products for our B2B customers in the Bay Area.

- Designed, implemented, and developed user friendly commercial websites using WordPress, JavaScript, HTML and CSS.
- Planned and designed website mockup for web components and UX redesign for existing commercial company websites using Sketch Design.
- Engaged directly with customers to assess and solicit feedback regarding website requirements.
